FREIGHT LABELING MADE SIMPLE

At Estes, we are committed to getting your freight where it needs to go, when it needs to get there. And accurately labeling your freight is one of the best ways to ensure your shipment gets from its origin to its destination without delays.

Required details to include on your shipping labels:

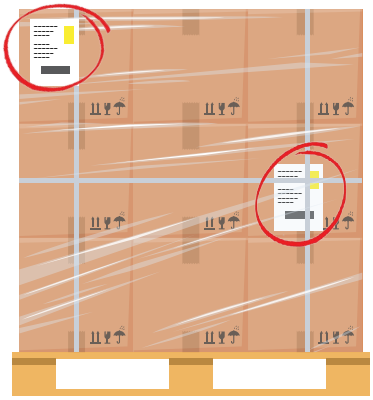
- **PRO number -** Used to track your shipment, usually 10 digits long
- **Consignee address –** Include street, city, state, and zip code
- **Time Critical Guaranteed** service (if applicable)

And if you are shipping multiple handling units, please write the quantity on each unit's shipping label, such as 1 of 2 and 2 of 2.

Note: Including a **reference number** like a Shipment ID, BOL, or PO number can also help us move your freight more efficiently.

Where to place your shipping labels:

- **On the sides and top of your freight -** Ensures quick visibility from multiple angles, especially if stacked
- **On the inside and outside of the pallet wrap -** Outer label allows for easy scanning, while the inner label ensures freight details remain visible, even if the wrap should get torn or ripped in transit



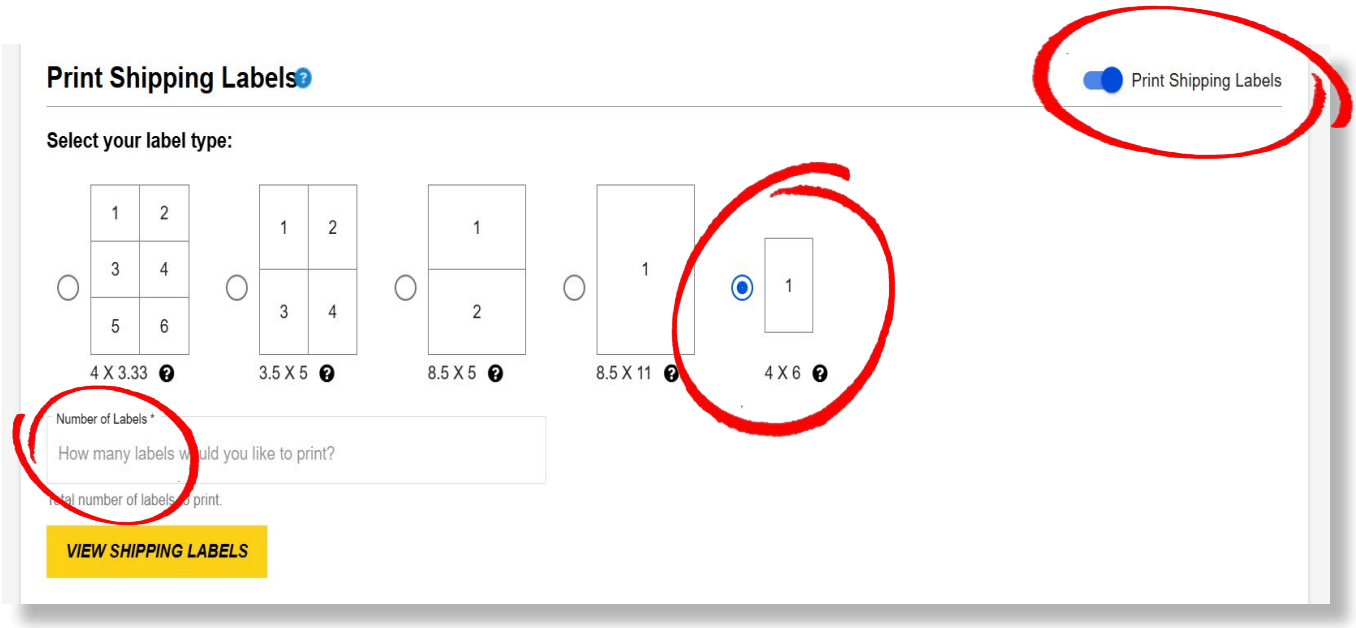
FREIGHT LABELING MADE SIMPLE

We make it easy to print shipping labels with all the required freight details!

How To Print Shipping Labels After Submitting Your eBOL

From your My Estes account:

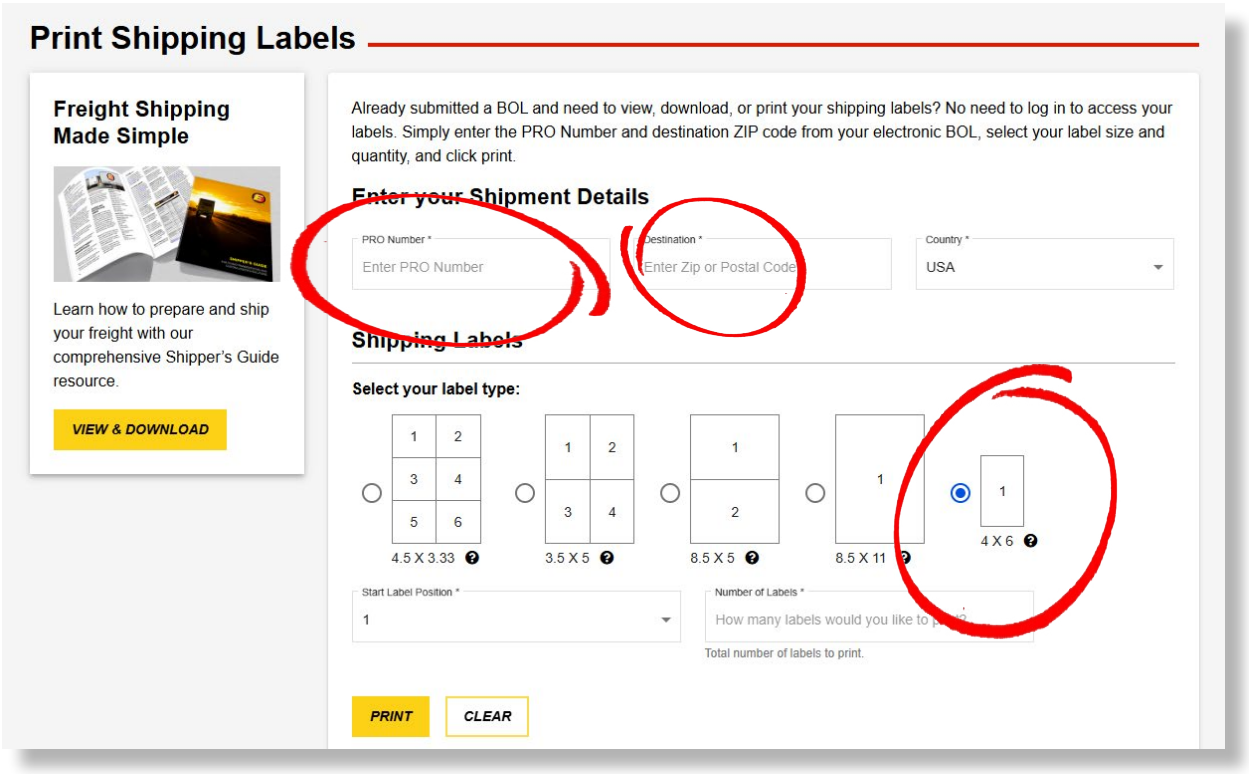
- On the BOL confirmation screen, select the **Print Shipping Labels** option
- Choose your preferred label size and enter your label quantity
- View your shipping label, check that the details are correct, and then select print



FREIGHT LABELING MADE SIMPLE

From the Print Shipping Labels (no login required):

- Navigate to the Ship menu on our Estes website and select Print Shipping Labels
- Enter the **PRO Number** and **destination ZIP code** from your electronic BOL
- Select your label size, enter your label quantity, and click print



At Estes, going the extra mile isn't just what we do—it's who we are
