APIs MADE SIMPLE

Estes' enhanced APIs can help elevate the freight shipping experience for you and the people you serve by providing real-time access to essential shipping services—right from your website or customer-facing platform!

Our API technology is designed to seamlessly integrate Estes data with your existing systems while helping you boost efficiency, streamline your operations, and stand out from the competition.

- **Rate Quote API** – Uses origin, destination, weight, and shipment type to return the most precise rate quote every time
- **Bill of Lading API** - Complies with the NMFTA Digital LTL Council's eBOL standard so you and your customers can enjoy a streamlined BOL creation process and even earlier shipment tracking
- **Pickup API** – Makes it easy to create, cancel, update, and track pickups, as well as view pickup milestones in real time
- **Shipment Tracking API** - Takes the stress out of freight delivery by providing real-time status updates on shipments
- **Image Retrieval API** – Offers the capacity to store and retrieve critical shipping documents, including BOLs, delivery receipts, and more

Want to learn more about the benefits of using our enhanced APIs? Contact our Web Support team or give your account manager a call today!

Or if your IT team is ready to get started, they can view codes, capabilities, and more in our API Portal.

At Estes, going the extra mile isn't just what we do—it's who we are
